RAJARAM P. BADIGER
Founder and
Managing Director

VITHAL T. SUTAR
Director

MISSION

To promote healthier and happier lives by delivering wellness-driven solutions that truly reflect our belief in “Wellness Through Wealth.”

VISION

To continuously innovate new products, drive sustainable development, generate meaningful employment opportunities, and remain committed to environmentally responsible growth.

COMPANY CULTURE

Our culture is built on respect, commitment, teamwork, research & development, accountability, transparency, and fairness, creating a strong foundation for long-term excellence.

Founded in 2012 by visionary entrepreneur Mr. Rajaram Badiger, Managing Director of Goodwill Creation, Aqua Gold Plus has emerged as a trusted brand in advanced water purification and treatment solutions. Headquartered in Chikodi, Karnataka, the company has grown into a strong organization with a wide regional presence and thousands of satisfied customers.

Our diversified product portfolio includes Domestic RO Systems, Commercial Purifiers, Industrial RO Plants, RO with Coolers, Water Softeners, Demineralized Plants, Solar Water Heaters, and customized water treatment solutions.

In addition to water purification, our presence also extends into the beverages industry, offering premium products such as Mineral Water Bottles, Alkaline Water Bottles, and Soft Drinks, strengthening our commitment toward wellness-driven lifestyles.

As an ISO 9001:2015 certified company with FSSAI License, we are committed to maintaining the highest standards of quality, safety, compliance, and service excellence across all our products and operations.

At Aqua Gold Plus, we stand as a symbol of quality, trust, and innovation in water technology, dedicated to creating a healthier future through our promise of “Wellness Through Wealth.”

Let us drink pure water for a healthier life and create true wellness through wealth.

OUR PRODUCTS

- Packaged Drinking Water & Beverages
- Domestic Water Purifiers
- Commercial Stainless steel Water Purifiers
- Stainless Steel Treated Water Storage Tanks With Inbuilt Purifiers
- Stainless steel RO with Coolers
- Water Softeners
- Demineralize Plants (DM Plant)
- Industrial Model RO Plants
- Stainless steel water storage tanks
- Solar Water Heaters

TECHNICAL SPECIFICATION

Purification capacity: 12 to 15 ltr /hrs.
 Storage capacity : 10 to 12 ltr.
 Max duty cycle : 80 ltr.

Inlet pressure min : 0.5 to 5kg.
 Pure water recovery: Upto 40- 50%.
 Power consumption: 30w max.

Max feed water TDS : 2200.
 Electric supply : AC 180 -240v.
 Operation : Fully automatic.

INFORMATION OF PURIFICATION STAGES

GST Extra

Micron filter (pre filter): Removes dirt, debris, and tiny microscopic particles from water.

Inline sediment filter : Removes sand and dirt effectively.

Pre carbon filter : Eliminates bad odor and improves taste.

Antiscalant filter : Prevents scale buildup and protects the system.

RO (Reverse Osmosis): Uses a semi-permeable membrane and

Post carbon filter: Removes odor, gases, and bad taste for clean, fresh, and healthy water.

UV-Ultra violet : Uses UV light to kill harmful microorganisms.

UF-ultra filter : Removes dissolved and fine particles using low pressure.

Alkaline with zinc & copper : Raises pH and adds essential minerals like zinc and copper to improve water quality.

How Can a Water Softener Benefit Your Lifestyle

Helps You Avoid Costly Repairs for Appliances

Avoid Mineral Build-Up in Your Plumbing System

Softer Skin and Hair

Improve Your Dishwasher Efficiency

Demineralize Plant (DM Plant)

Demineralization, the process of removing nearly all dissolved salt and mineral ions from water, can prove ideal for facilities requiring ultrapure water for a variety of applications.

Demineralization by ion exchange, electro deionization, or membrane filtration can produce water that is nearly 100% free of minerals and salts including.

KEY FEATURES

Cost-Optimized Design

Engineered to deliver reliable purification at an economical investment.

Semi-Automatic Operation

Manual control for system start/stop and process management.

Durable Industrial-Grade Construction

Built with robust materials to ensure consistent performance.

Effective Carbon Filtration

Utilizes quality activated carbon for removal of chlorine, odor, and impurities.

Manual Control System

Operator-controlled functionality for flexible handling and

Standard Quality Components

Carefully selected components for dependable and long-lasting operation.

Simple Operation & Maintenance

Easy to operate with straightforward maintenance requirements.

Efficient Salt Rejection

Provides good TDS reduction suitable for standard industrial applications.

Multi-Stage RO Purification System

Ensures effective removal of dissolved salts and contaminants.

KEY FEATURES

High Energy Efficiency

Optimized for low power consumption without compromising performance.

Fully Stainless Steel (SS 304) Construction

Durable, corrosion-resistant body ensuring long operational life.

High-Quality Activated Carbon Filtration

Enhances removal of chlorine, odor, and organic impurities.

Fully Automatic Operation

Ensures seamless functioning with minimal manual intervention.

Advanced Digital Control System

Intelligent monitoring and precise control of system operations.

Premium-Grade Components

Built using high-quality materials for reliability and consistent performance.

User-Friendly Interface & Easy Maintenance

Simplified operation with convenient access for servicing and upkeep.

High Salt Rejection Rate

Delivers superior water purity with efficient TDS reduction.

Advanced Multi-Stage

Purification with RO Membrane Technology

Ensures comprehensive removal of dissolved salts, contaminants, and impurities.

Stainless Steel (304) Water Storage Tanks

Model No	Tank Capacity (in Liters)	Tank Height (feet)	Tank Diameter (feet)	Price
AG69	250	4.0	2.6	₹ 12,000
AG70	500	5.10	2.6	₹ 16,000
AG71	1000	5.10	3.4	₹ 22,000
AG72	2000	6.6	5.0	₹ 30,000
AG73	3000	8.5	5.0	₹ 36,000

Height includes stand, which is about 1.5' (18")

Ground clearance would be around 8 To 9" from center of the bottom dish.

All capacity of tanks will be fitted with two inlets and two outlets.

Inlet/outlet Sizes are $\frac{3}{4}$ ",
1," 1 ½" and 2"

Inch depend on tank storage capacity.

Solar Water Heater

WHAT IS GLASS LINE TECHNOLOGY?

Glass lining is a process where powdered glass is fused onto the inner surface of a metal tank at high temperature (850–870°C), creating a strong coating that prevents rust and corrosion and increases the lifespan of the solar water heater.

TECHNICAL SPECIFICATIONS

Type of Collector : ETC

System Capacity : 110, 165, 220, 310 & 500 LPD

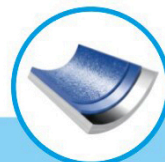

Inner tank Materials : 1.6 mm, low carbon TATA Steel

Inner tank Protection coating :
Food grade Enamel Glass lined with
200 TO 250 Micron thickness.

Puff Density : 40 Kg/Mt³ETC Tubes :
Ø 58 X 1800 mm, Boro silicate Glass tubes
with 0.92 Absorbity

Puff Insulation : Polyurethane Foam, CFC FREE.

Special Feature : Digital controller with 24x7 Hot water.

WITH GLASS LINE TECHNOLOGY
